

HANDY GAS SHUTTLE CART

HANDY GAS CADDY
Catalog No. 12652

“Quick Lube” oil change service keeps costs down and efficiency up!

Speed up those hot oil changes! This completely portable suction tank quickly removes oil from the engine oil tank, transmission, and on some models, even the primary chaincase. Only 42" high, this shop-air charged evacuator vacuums oil into its tank through a flexible wand. No need to remove or replace a drain plug, hoses, wires or side cover from the bike.

Simply connect an air line to vacuum-charge the evacuator. Disconnect the air and roll unit to the vehicle. Using a flexible wand (supplied), remove waste oil through the motorcycle's oil fill hole by turning a lever. Once the 7-gallon capacity has been reached, simply hook up to an air line and move the lever to the flush position, thus emptying oil directly into your waste oil storage container. A quick disconnect air line coupler is supplied for fast hook-ups.

The Waste Oil Evacuator saves time, eliminates spills and makes for a cleaner service department.

PORTABLE WASTE OIL EVACUATOR
Catalog No. 9260D

SPECIFICATIONS

- 28 Quart holding tank
- 42" high
- Utilizes standard shop air
- Heavy-duty construction

FEATURES

- Saves time & eliminates messy spills
- 3 Different vacuum drain wands for versatility
- Vacuum gauge
- Noise reducing venturi muffler
- Sight gauge indicates tank oil level
- Pressurized evacuator system allows for fast draining

The 30-gallon Gas Caddy is the ideal solution for storage and dispensing of gasoline in your Service Department. Specifically designed to comply with labor and safety laws, the Handy Gas Caddy meets all O.S.H.A. requirements. The heavy-duty welded steel construction is built to last. A two-way rotary pump allows your technicians to both siphon and dispense fuel. To siphon gasoline into the cart's tank, simply turn the pump's operating handle counter-clockwise. To transfer gasoline from the cart to any fuel tank, turn the handle in the opposite direction. What could be simpler?

FEATURES

- O.S.H.A. Compliant
- Firescreened safety vent & fuel gauge
- 2" Filler hole for easy fill-ups
- Contamination drain
- Static ground wire with clamp
- See-through hose for in-line fuel viewing
- Large 10" dia. rubber tires for easy mobility

GROVER PNEUMATIC BULK OIL DISPENSING SYSTEM

Clean, accurate and cost efficient, this dispensing system is another key ingredient for effective "Quick Lube" oil changes. An air-powered oil pump is mounted in the bung of a 16-gallon or 55-gallon oil drum. The handheld trigger-actuated pump accurately dispenses oil from your bulk oil drum.

This single reel system comes complete and is available for readout in either quarts or cc's. Call for additional brochures detailing the entire line of Grover products.

BULK OIL DISPENSING SYSTEM WITH OVERHEAD REEL
Catalog No. 7603-25

SPECIFICATIONS

- Easily mounts to 55 gal. or 16 gal. drum
- Reel attaches to wall or ceiling
- Utilizes standard shop air
- Multiple reel locations available

FEATURES

- 50 feet of oil hose (25 ft. up and 25 ft. down)
- Metered oil control unit with no-drip nozzle
- Continual digital reading of total quarts dispensed
- Overhead reel keeps hose off the floor & out of the way
